As dementia progresses, patients can have signs of psychosis, in which they have
hallucinations and delusions that are not grounded in reality. The Merck Manual
Home Edition points out that hallucinations differ from delusions in that
hallucinations are perceived as real by the patient, while delusions are held as
true beliefs even when evidence to the contrary is presented. Causes of
Elderly Dementia · What Are the Treatments for Dementia With Lewy Bodies. Other common
types are vascular (multi-infarct) dementia, which is caused by strokes, and Lewy body
dementia. Many people have more than one of these. The terms dementia with Lewy bodies and
